---

Good afternoon,

The Pre-RD group has completed maintenance checks on 10 of the 34 acoustic receivers. The crew is establishing communication with the receiver and checking the receiver health status. Thus far, all receivers have between 0-4% battery used, 80-84% memory left, and all receiver tilt angles have been oriented at angles less than 10°. The crew plans to make their way down from RM 11.5 towards the channel next.

Thanks,  
Jonni
